IRONCLAD™

THE ULTIMATE SURFACE PROTECTION TECHNOLOGY

Enhanced Durability

The dense, high-strength facemix layer resists chipping, cracking, and surface wear.

Rich, Lasting Color

Premium pigments and fine aggregates minimize fading, keeping pavers vibrant for years.

Smooth & Refined Finish

A sleek surface texture adds elegance while improving slip resistance.

Weather & Stain Resistant

Withstands freeze-thaw cycles, salt exposure, and everyday stains.

Superior Bonding

The facemix layer is integrally bonded to the base, ensuring structural integrity over time.

What is Ironclad™?

Ironclad™ is a proprietary surface-layer technology developed by Orange Pavers to deliver superior durability, color longevity, and resistance to wear. Engineered using high-quality cement, ultra-fine sand, and advanced bonding techniques, Ironclad™ ensures a refined, smooth finish that withstands harsh weather, UV exposure, and heavy foot traffic.

The color options are composed of a range of darker and lighter tones for an authentic look. The natural ingredients in this recipe allow each stone to have a unique tone, veining, and texture. Samples of colors are provided for reference only. Colors of the actual product may differ.

Quality is our top priority

Homeowners, architects, builders, and developers alike turn to us for the best paver products on the East Coast because of our clear objective, years of experience, and a commitment to using traditional worldwide innovation methods.

LOW MAINTENANCE

Using natural and high-quality materials, our pavers are strong, durable, and reliable and require minimal maintenance. No special treatments are required to maintain the overall quality and aesthetics, meaning you get to enjoy your product for years to come.

AFFORDABLE

By choosing Orange Pavers to complete your next outdoor design with high grade pavers, you are instantly increasing the value of your investment. You also get to enjoy a one time investment for a product that will last a lifetime.

SUSTAINABILITY

Our goal is to bring customers a finished product that will last while caring for the environment. Our process includes using natural resources to create pavers that you can be proud of.

Warranty

All **Orange Pavers** products comply and surpass with the current standards established by American Society for Testing and Materials (ASTM). **Orange Pavers** offers a lifetime transferable warranty for residential projects. Starting from the delivery date to the job site that covers the structural integrity of the products and any abnormal deterioration of its surfaces. Registration is required and must be complete within 90 days of your dated proof of purchase. The warranty registration can be completed online at **Orangepavers.com**

INSPIRATION

Our company was built on inspiration. In order to help our customers create their dream outdoor living spaces, we love to share that same spirit.

INNOVATION

At Orange Pavers we constantly strive to produce the most advanced product by incorporating the latest and most effective methods and technologies.

QUALITY

In order to ensure the highest standards for our concrete paver systems, our plants receive annual certification by The Interlocking Concrete Pavement Institute (CMHA).

FOCUS

With a distinctive and customized approach, we embark on each project with enthusiasm and passion to create the desired outdoor living space envisioned by our customer.

EXPERTISE

Renowned for our expertise within the hardscapes industry, we take great pride in our ability to provide others with insights, education, and training.

ORANGE[®]
PAVERS

Your satisfaction is our mission and we are with you every step of the way

Pathway in White

Why choose pavers

FUNCTIONALITY

Quickly and easily replace single pavers for on-site repairs

ECO-FRIENDLY

No harmful substances released when heated.

DURABILITY

Water cannot penetrate due to density and lack of air pockets

DESIGN

With our wide array of colors and sizes to choose from, you can create virtually unlimited patterns and styles.

Concrete pavers made from recyclable natural materials are an outstanding example of an eco-friendly patio solution.

Orange Pavers are an eco-friendly choice enabling the enhancement of backyards and driveways, while protecting the environment. Our pavers are made responsibly from recyclable natural materials, require far less fuel when quarrying or transporting, look very attractive, and do not emit harmful substances when heated.

Paver material options

Whether you are designing a pathway, patio, driveway, or pool, you'll want to be sure you choose the best material for the project. With pavers, your options include clay, concrete, manufactured porcelain, and more.

One of the most cost effective and durable options is concrete pavers. By choosing to use concrete as your paver material, you can enjoy the benefits it offers, including good traction, wide color options, color longevity.

Residential & Commercial

Designed to last. Whether your design requires a rugged environment or a sleek indoor space, we have the commercial grade pavement for you.

Smooth or Textured?

Explore our two collections

| ≡ | Smooth

Sleek, even texture offers a polished finish underfoot bringing a refined and elegant ambiance.

| ≡≡≡ | Textured

A textured surface pattern adds both visual interest and practical function, enhancing aesthetic appeal, and adding depth and character to walkways, patios and driveways.

Here are some common **Do's** and **Don'ts** when selecting material choices

- Visit our showroom and view our product brochures.
- Play with mixing textures and forms (smooth/textured, dark/ bright, wide/ narrow pavers, etc.).
- Invest in the right material for your specific needs.
- View pavers in sunlight for accuracy.

- Don't commit to any color without viewing it in natural light.
- Don't combine more than three core colors (with the exception of wood and stone).
- The color options are composed of a range of darker and lighter tones for an authentic look. The natural ingredients in this recipe allow each stone to have a unique tone, veining, and texture. Samples of colors are provided for reference only.
- Colors of the actual product may differ.

Choose your favorite colormix

There is nothing we love more than natural hues. We carefully considered our color selection so that all of your favorites would show up in other collections, allowing you to mix, match, and contrast as you choose. We take great pride in the distinctive color combinations we use to create each product.

We are proud of our unique shades of color mix, where each product is unique.

Here are some **Do's** and **Don'ts** when selecting color choices.

Do

Choose color to highlight your home's architectural features and accents.

Match colors to the current landscape palette. Before committing, lay out your final options. You will have a better understanding of the outcome by viewing your color choices lying flat.

Book a free color consultation with an expert guide.

Don't

Don't commit to any color without viewing it in natural light.

Don't combine more than three core colors (with the exception of wood and stone).

Hot tip!

To create consistency and a pleasing contrast, choose colors that complement the existing furniture or accents in your space.

Bullnose Pro

Compactor and snow removal equipment

Pavers with an embossed surface (high and low points) are more susceptible to scuff marks from vibratory plate compactors used in most concrete paver installations. Orange Pavers recommends the use of a urethane mat between the plate and the paver surface during compacting. Contact your equipment supplier for more information about accessories for this purpose. Also, snow removal equipment should have the proper spacing, bumpers, and rubber blade guards to protect the surface of the pavers.

A standard of care

High-quality concrete products require the same maintenance as any other product that is exposed to the environment 365 days a year. Similar to cleaning patio furniture, a car's chrome, plastic, or paint, etc., very gentle cleaning with detergents, water, and product-specific chemicals is required to increase their presence and appeal. For further defense against acid rain, stains, and the worst of nature, protective coatings of every kind – high, moderate, and low sheen, pigmented or tinted, penetrating or film forming – are available. Take care of your investments to receive the maximum return on your money, and they will take care of you.

Polymeric haze

Polymeric haze from the use of polymeric joint sand may appear on your concrete products if the sand was not properly removed from the surface of the paver. This does not, in any way, affect the integrity of the product or your installation. The hazing will weather away naturally with time and rain, or it can be removed with a specialized cleaner. For directions and suggestions, you are advised to get in touch with your contractor or the supplier of the polymeric sand.

Efflorescence

This warranty does not apply to efflorescence. Efflorescence is a natural occurring process in all concrete products which sometimes appears in the form of a white powdery film on the pavement surface. Efflorescence is more perceivable in darker colors as there is a higher level of contrast than with other blended colors. It does not, in any way, compromise the functionality or the structural integrity of the product.

Color

Each color option is comprised up of several lighter and darker tones. To allow for a variety of tones, veining, and textures from one stone to another, natural elements like granite are included in the mix. Orange Pavers cannot guarantee exact color matching to printed versions of its color swatches due to the inherent nature of printed literature and current digital media. The color samples shown are approximate representations of our standard colors, and actual product colors may differ. Therefore, the final color choice should be taken from the product that is in stock at your local retailer.

Construction residue

A by-product of cutting with a saw is residue-filled water or concrete dust. Residue filled water or re-hydrated dust can cling to the surface and leave a concrete stain. It is recommended to wash and remove the water or concrete dust from the surface of the pavers before it dries. Construction residue can also happen through soil disturbance or environmental elements.
